

From Leipzig to Chile

Marion Schulteis

Santiago, Chile

Marion Schulteis got to know the seminar Effective study while a student at the University of Leipzig. Now, as a STINT in Chile, she is multiplying it. Marion writes: "It helped me a lot to structure my materials but also to plan my time wisely! And I did finish my studies successfully and pretty much on time!!! (Only 7 weeks later...!!!) Anyhow, last semester we offered it for the first time at one University here in Santiago and this semester we expanded it a little and offer it at 4-5 Universities. We already have been at 3 Universities and it was a great success! Also this time for the first time a student helped teach and we had a training session before the semester started which also helped a lot!

All students know matter from which University really appreciated the seminar and especially that parts where they have to be active, e.g. to create a mind map or do a learning style test, or simply write out their vision or their goals for life, which was not always that simple!!!

So now we are taking a little break and the next time Estudio Eficaz will take place at the University Andres Bello at the end of September.... "
